Emaar Properties PJSC

Update following the upgrade to Baa1

Summary

On 29 May 2025, we upgraded Emaar Properties PJSC's (Emaar) issuer rating to Baa1 from Baa2. The rating action reflects the company's strong revenue visibility over the next three years, proven track record of conservative financial policy including debt reduction, growing earnings from its recurring income generating portfolio, and strong credit metrics. The rating action is also supported by improved resilience in macroeconomic conditions of the Emirate of Dubai and the favorable operating environment in the real estate sector. Emaar's strong credit metrics and performance is backed by a solid revenue backlog of AED 127 billion as of March 2025.

Emaar's Baa1 rating reflects: (1) continued growth in its portfolio of mature recurring-income assets which contributed more than AED 7 billion in EBITDA in 2024; (2) strong domestic and international property sales backlog of AED 127 billion as of March 2025 which offers significant homebuilding revenue visibility; (3) access to a sizeable land bank in Dubai partly through strategic joint-venture (JV) partnerships with government-owned entities; (4) solid financial profile with a net cash position and debt to book capitalization of around 12% as of Q1 2025; and (5) excellent liquidity profile with favorable payment plans supporting limited upfront investments.

The rating also takes into account (1) the concentration risks stemming from Emaar generating the majority of its cash flows from Dubai; (2) the exposure to increasing competition in the Dubai real estate market where an increased supply of units could pressure price or margins; (3) the demand uncertainties related to sentiment-driven customer base with high number of expats; and (4) the development and execution risks given the capital-intensive nature of the business.

Exhibit 1

Credit metrics will continue to remain robust for the medium term

All data based on adjusted financial data, which follow our Financial Statement Adjustments in the Analysis of Nonfinancial Corporations methodology. LTM = Last 12 months. Moody's forecasts are Moody's opinion and do not represent the views of the issuer.

Sources: Moody's Financial Metrics™ and Moody's Ratings forecasts

Credit strengths

- » Growing and relatively stable earnings from mature assets provide buffers against volatility in the real estate development business
- » Significant sales backlog provides a degree of cash flow visibility over the next three years
- » Good market position with access to sizable land-bank in Dubai, partly through JV partnerships with government-owned entities
- » Excellent liquidity profile

Credit challenges

- » High geographic concentration risks stemming from Emaar generating most its cash flow from Dubai
- » Demand uncertainties related to sentiment-driven customer base
- » Development and execution risks given the capital-intensive nature of the business
- » Exposure to the cyclical real estate market

Rating outlook

The stable outlook reflects our view that the company will maintain solid credit metrics and excellent liquidity through 2026 driven by strong revenue visibility and proven track record of good execution.

Factors that could lead to an upgrade

The rating is constrained at the current level given the high degree of revenue concentration within a single market. However, Emaar's rating could be upgraded if the company is able to expand on a sustained basis its scale and market position significantly through diversification into mature markets with low price volatility, and grow its recurring income portfolio across asset types. Additionally, maintenance of conservative financial policies including debt to book capitalization below 10%, gross margins above 50%, and excellent liquidity would be important factors.

Factors that could lead to a downgrade

The ratings could be downgraded if there are sustained weaknesses in Dubai's macro-economic environment or real estate market, Emaar's adjusted debt to book capitalization sustained above 20%, debt to EBITDA exceeded 1.5x, EBIT to interest expense sustained below 10x, liquidity weakens, or the company decides to pursue a more aggressive financial policy.

Profile

Emaar Properties PJSC, based in Dubai, United Arab Emirates, is a leading real estate master developer in the Gulf Cooperation Council (GCC) countries by sales and market capitalisation. Emaar's main shareholder is the government of Dubai, with a 29.73% stake held

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody.com> for the most updated credit rating action information and rating history.

indirectly through Investment Corporation of Dubai (ICD) and Dubai Holding (DH). Emaar Properties' main subsidiaries are Emaar Malls Management LLC and Emaar Development PJSC. The former owns the majority of Emaar's recurring income portfolio including Dubai's largest shopping centre and the latter is the publicly listed UAE development arm of the company.

For LTM ending March 2025, Emaar generated AED38.9 billion (\$10.6 billion) in revenue and AED18.4 billion (\$5.0 billion) in net profit.

Detailed credit considerations

Robust credit metrics will sustain through 2027 driven by demonstrated track record of conservative financial policy and strong earnings growth

We expect Emaar's financial leverage, measured by debt to book capitalization, to remain robust through 2027, underpinned by growth in earnings and the company's commitment and track record of reducing debt. We forecast Emaar's financial leverage to decline to about 11% in 2025, 8% in 2026, and 7% in 2027, from 12% in LTM March 2025.

The improvement in financial leverage reflects our expectation of continued earnings growth on the back of large revenue backlog of about AED 127 billion, and management's proactive approach to managing upcoming debt maturities, including the planned repayment of the \$750 million sukuk due in September 2026, partially offset by relatively higher dividend payment. Additionally, we expect gross debt to EBITDA to remain strong below 1x and EBIT to interest coverage to sustain above 20x over the 2025-2027 period, supported by strong EBITDA generation and low levels of gross debt and interest expense.

Emaar's improving credit metrics are consistent with its track record of maintaining a conservative financial policy and strong credit profile. The company's commitment to deleveraging is evident in the reduction of total adjusted debt from AED 22.8 billion in 2020 to AED 12.6 billion as of March 2025, with a further decline to below AED 10 billion projected by 2027.

An established dividend policy allows Emaar to preserve liquidity and balance capital allocation between growth investments and shareholder returns. The new dividends policy is based on two parts; the first part comes from the recurring income portfolio (Malls, Hospitality, Entertainment, Others) which includes a payout of 40-60% of annual net profit before depreciation; the second part is paid out of the development business and includes 20-40% of cash flows generated from the development business.

Strong revenue visibility and improved scale partially mitigates concentration risk

Emaar is the largest master developer in the UAE with more than 76,000 units delivered as of March 2025. The company's significant scale in the region and sizable land bank provide a competitive advantage over smaller peers, enabling it to achieve economies of scale and adjust its development pace through the cycle.

For instance, Emaar strategically paused major project launches in Egypt due to weaker economic conditions, redirecting its focus to areas experiencing strong demand such as Dubai and India. This strategic agility is reflected in its robust revenue backlog reaching AED

127 billion as of March 2025, an increase from AED 53.2 billion in 2022. Notably, 88% of the current revenue backlog was recorded from projects in the UAE, up from 78% in 2022.

This strong backlog underpins Emaar's revenue visibility over the next three years. It represents sales of 94% of the 44,000 units currently under construction, with 40% of the value already collected in cash and held in escrow accounts.

While Emaar's real estate development revenue and EBITDA are primarily concentrated in Dubai (Exhibit 4), this concentration is partially offset by a portfolio of assets that generate stable, recurring income and, to lesser extent, its international development operations. Nevertheless, the company remains significantly exposed to the Dubai market, where it remains active across multiple real estate segments. These include the sale of residential and serviced apartments, villas, and office spaces; the management and leasing of retail properties; and the operation of hotels.

Exhibit 5

More than 90% of Emaar's revenue was generated in Dubai in 2024

Source: Company filings

As a master developer, Emaar subcontracts the construction of buildings through a tender process and tends to retain hotel and retail spaces to add into its investment portfolio while selling residential and some office space. Emaar structures its projects so that majority of cash receipts (deposits) are front-loaded with more than a third of the sales price received within the first 12-18 months. This allows the company to pre-fund a material portion of the construction costs and cushion against significant swings in market demand because customers tend to stick with their purchase.

Market conditions in Dubai are expected to remain stable through 2025, but cyclical risk remains

We expect Dubai's real estate market to remain stable over the next 12 to 18 months, following a period of significant growth. Between September 2020 and April 2025, average residential property prices rose by approximately 78%, driven by robust housing demand. The demand for residential real estate is partially driven by proactive government policies that are attracting international investors and workers, population growth with improving economic conditions and relatively easy visa process, geopolitical conflicts in the region, and supportive oil prices fueling consumption. This in turn resulted in the accelerated pace of project launches and unit handover, and driving unit sales price up.

According to REIDIN, Dubai residential average sale prices have increased by around 20.1% in 2023 and 18.0% in 2024 (Exhibit 5) with villas performing better than apartments (Exhibit 5). Factors contributing to the growth in the current cycle are expected to remain more sustainable for the long term prospects of the market. Over the past two years, population growth and higher investors has provided a sustained level of demand.

Exhibit 6

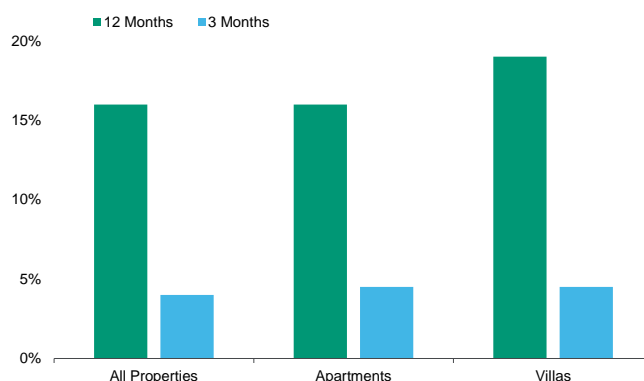

Dubai residential prices have steadily increased since the end of 2020 and have crossed the 2014 peak..

Source: REIDIN

Exhibit 7

.. with supportive prices seen in the last twelve months across property types

Source: CBRE - UAE Real Estate Market Review Q1 2025

Following the robust sales growth recorded over the past three years, we project the market in 2025 to remain well-balanced at the current levels, with expected supply increase will be matched with population growth. Between 2026 and 2028, we anticipate a notable increase in deliveries from projects currently under construction. This influx is likely to restore equilibrium between supply and demand for ready units, thereby limiting further upward pressure on prices. However, Dubai's open economy remains exposed to weaknesses in global and regional demand. A sharp decline in oil prices potentially due to global growth headwinds would reduce spending in the region and weigh on economic activity and investor confidence in the region, thereby, could effect Emaar's future sales.

Improved Emaar's earnings resiliency driven by a growing portfolio of mature and recurring revenue assets

We view Emaar's recurring revenue as a credit strength, providing a financial buffer during periods of volatility in the property development sector. Emaar Malls Management (EMM) plays a key role in this regard, contributing to earnings and cash flow stability through multi-year lease agreements and high operating margins—86% as of Q1 2025. Emaar's EBITDA generated from its recurring revenue portfolio has grown meaningfully to more than AED 7 billion in 2024, up from below AED 5 billion in 2020 on the back of significant investments and cost optimizations. We expect recurring revenue portfolio's EBITDA to continue to grow and will reach close to AED 9 billion in 2027, driven by continued investments, strong demand, and the ramp up of newly opened malls.

In 2024, increased footfall, strong occupancy rates, and significant growth in tenant sales drove higher rental income across Emaar's mall portfolio. Looking ahead, we expect the operating environment to remain favorable, supported by robust macroeconomic conditions in Dubai. This should continue to fuel growth in EMM's revenue and cash flow.

Emaar is also actively investing in its recurring revenue portfolio to meet rising market demand and enhance cash flow visibility over the next 12 to 18 months. Notable projects include the AED 1.5 billion expansion of Dubai Mall and the development of Dubai Creek Harbour Mall.

The majority of Emaar's recurring revenue assets—spanning retail, hospitality, and entertainment—are located in Dubai and are primarily owned and operated by its wholly owned subsidiaries, including EMM. The remainder of the portfolio is situated in international markets such as Egypt and Türkiye. EMM holds a strong position in the retail leasing sector, backed by a portfolio of high-quality assets. Its flagship property, Dubai Mall, is a premier shopping and entertainment destination. Other key assets include Dubai Marina Mall, Dubai Hills Mall, two outdoor retail strips in Downtown Dubai and Dubai Marina, specialty retail at Gold and Diamond Park, Souk Al Bahar, and several neighborhood retail centers. Occupancy across Emaar Malls' assets remained resilient at 98% in Q1 2025.

Customer-financed project developments reduce balance sheet risk

Emaar has taken a disciplined approach to funding developments in existing master communities, for the most part, through construction-linked customer payments and therefore has not needed to use long-term debt funding for its development-related working capital needs. Up to March 2025, Emaar had collected around AED 61 billion of cash receipts against launched UAE

development projects valued at around AED 163 billion. We expect new development projects will continue to be financed through customer deposits but infrastructure developments which usually require additional upfront investments will be financed mainly with free cash flow and unrestricted cash at balance sheet. Investment properties to be built in these locations, such as malls and hotels will also need additional funding but we believe Emaar will fund these projects mainly using its unrestricted cash sitting on the balance sheet (AED 25.4 billion as of March 2025) over the short term.

We believe Emaar's land acquisition strategy will consist of a combination of cash financed land acquisition supported by ample cash at balance sheet and joint ventures (JV) with strategic partners. Historically, Emaar established strategic JV partnerships with three Dubai government owned entities, namely Meraas, Dubai World Central and [DP World Limited](#) (Baa2 stable) through which it has been able to secure a sizable land bank. We view the JV partnerships as credit positive because Emaar does not have to pay any cash upfront but rather unlock and share value as projects are developed and sold. The parcels Emaar acquires through JVs are usually large, have high value, and in prime locations.

The government-owned JV partners interest is aligned with Emaar's because they plan and develop projects together. However, real estate projects with JV partners have their own execution risks and there is uncertainty around the full extent of funding needs for these projects. Emaar's biggest project with a JV partner is the Dubai Hills Estate valued at about AED 25.8 billion as of March 2025.

International operations are less mature but have long-term potential

Emaar's international operations support some geographical diversification. Although these operations are self-funding entities that have not required ongoing financial support from Emaar, international projects entail higher execution risks as compared to the domestic business because of the economic challenges that the core countries face. This creates uncertainty around the timing and quality of investment returns and partially offsets the geographic diversification benefits. As of 31 March 2025, Emaar's international operations had a backlog of AED 15.3 billion, with the bulk of units being built in Egypt and India, while the total international operations contributing around 6% of total revenue during Q1 2025. The real estate market fundamentals in Egypt and India are markedly different from that of Dubai, with a large growing indigenous population driving strong need for housing, but which is also exposed to macroeconomic challenges and currency fluctuations.

ESG considerations

Emaar Properties PJSC's ESG credit impact score is CIS-2

Exhibit 8

ESG credit impact score

Source: Moody's Ratings

Emaar's ESG credit impact score of **CIS-2** indicates that ESG considerations have limited to no impact on Emaar's current rating. Emaar has a moderate exposure to environmental and social risks while governance risks have a neutral impact on the rating, reflecting its conservative financial policy and good liquidity risk management, particularly during the coronavirus pandemic.

Exhibit 9

ESG issuer profile scores

Source: Moody's Ratings

Environmental

Emaar's **E-3** mostly relates to physical climate and natural capital. Emaar has a relatively diversified portfolio of assets and continually invests in the assets to mitigate event and operational risks. Nevertheless, real estate companies' exposure to physical risk is material given our expectations of more frequent and severe climate events and a steady increase in surface temperatures, and their physical asset-intensive business models. In our view, these property assets are at greater risk of impairment due to extreme weather events, which expose property developers to increased construction and repair costs. Physical climate risk and more stringent regulation will raise construction costs. However, associated environmental regulations have primarily been stable, and increases in costs can be largely passed to consumers. The need to exploit land resources exposes builders to natural capital risks and associated compliance costs related to land preservation.

Social

Emaar's **S-3** is driven by demographic and societal trends because Emaar is exposed to demographic changes due to a large expatriate population. Demographic changes and affordability are important factors driving demand, and changes in these areas could moderately affect the risks that property developers face. Human capital is generally not a major risk in Emaar's countries of operations, where labor costs are low and the labor pool is large. Property developers are also exposed to customer relations risk, which could impact brand reputation given customer satisfaction is closely linked to the quality of delivered property units. Cyber security risk associated with the collection of sensitive customer data is a key concern as well as the associated cost to ensure an appropriate protection process is in place.

Governance

Emaar's **G-2** is driven by the company's stated commitment to an investment-grade rating and the prudence and track record that the management have in running the business and liquidity.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Liquidity analysis

Emaar's liquidity is excellent with unrestricted cash balance of AED 25.4 billion as of 31 March 2025 and undrawn revolving credit facilities of AED 7.4 billion expiring beyond 2026. This is sufficient to cover debt maturities of AED 4.8 billion through June 2026 and our expectation of negative free cash flow of about AED 10.8 billion during the same period. A material portion of Emaar Properties' cash is restricted as a regulatory requirement to deposit customer installments linked to development projects in escrow accounts (AED 32.9 billion out of the AED 58.3 billion as of March 2025). Nevertheless, as contractors get paid through the escrow accounts and projects get delivered, Emaar's cash profit is released from these accounts.

Rating methodology and scorecard factors

In determining Emaar's ratings, we have applied our rating methodology for Homebuilding and Property Development. The scorecard-indicated outcome for Emaar is A3 while the actual assigned rating is a Baa1. The one notch in difference relates to the high geographic concentration of revenues and cash flows in the Emirate of Dubai and the cyclical nature of the development business.

However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Materials.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it. MCO and all MCO entities that issue ratings under the "Moody's Ratings" brand name ("Moody's Ratings"), also maintain policies and procedures to address the independence of Moody's Ratings' credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at ir.moody.com under the heading "Investor Relations — Corporate Governance — Charter and Governance Documents - Director and Shareholder Affiliation Policy."

Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V., I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., and Moody's Local PA Clasificadora de Riesgo S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.

Additional terms with respect to Second Party Opinions and Net Zero Assessments (as defined in Moody's Ratings Rating Symbols and Definitions): Please note that neither a Second Party Opinion ("SPO") nor a Net Zero Assessment ("NZA") is a "credit rating". The issuance of SPOs and NZAs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs and NZAs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
